Under the authority of *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on edible-podded beans to the product label of Allegro 500F Agricultural Fungicide, containing technical grade fluazinam. The specific uses approved in Canada are detailed on the label of Allegro 500F Agricultural Fungicide, *Pest Control Products Act* Registration Number 27517.

Corresponding maximum residue limits (MRL) were proposed in the consultation document published on 10 February 2010, Proposed Maximum Residue Limit PMRL2010-09, *Fluazinam*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect as of the publication date of this document and are in addition to the MRL on potatoes already established for fluazinam.

Established Maximum Residue Limits for Fluazinam

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Fluazinam	3-chloro-*N*-[3-chloro-2,6-dinitro-4-(trifluoromethyl) phenyl]-5-(trifluoromethyl)-2-pyridinamine	0.1	Edible-podded jackbeans, edible-podded moth beans, edible-podded runner beans, edible-podded snap beans, edible-podded soybeans, edible-podded swordbeans, edible-podded wax beans, edible-podded yardlong beans

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
